

VOICE OVER IP IN THE CLOUD

INTERNET TELEPHONY FROM THE CLOUD

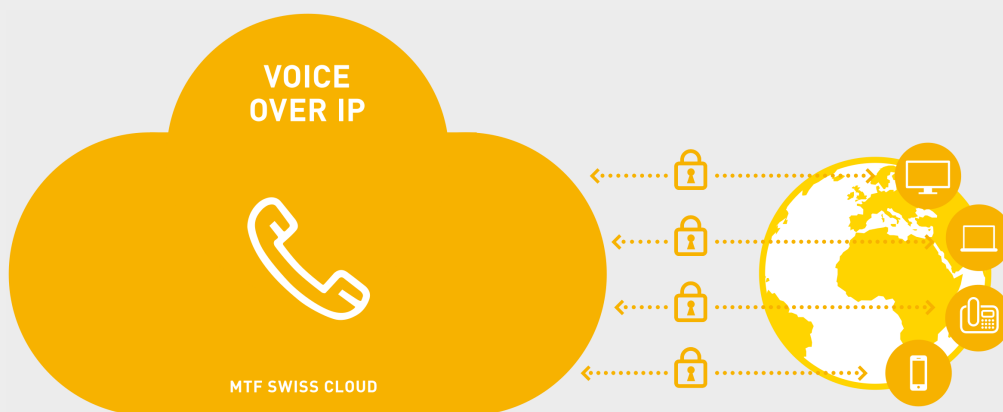

Voice over IP (VoIP) via the MTF Business Cloud enables forward-looking communication and offers a scalable and cheap cloud telephony solution. The product bundles all communication channels, such as voice, e-mail, video, voicemail, instant messaging and application sharing, for various software solutions or hardware terminals.

YOUR ADVANTAGES

- ✔ EXCELLENT VOICE TRANSMISSION QUALITY
- ✔ HYBRID CLOUD INSTALLATION POSSIBLE
- ✔ ENCRYPTED CONVERSATIONS
- ✔ MAKE AND RECEIVE CALLS WHEREVER YOU MAY BE
- ✔ OWN ISOLATED INSTANCE
- ✔ SCALABLE AND CHEAP

VOICE OVER IP THE PERFECT CLOUD TELEPHONY SOLUTION

The customer-specific voice over IP switchboard runs separately in the MTF Business Cloud for each customer and is completely isolated from other systems. Optional software redundancy can be used to guarantee this telephony solution the highest possible availability. Telephones or terminals connect via a high-security VPN tunnel to the dedicated cloud telephony system, through which all telephone calls between the end client and the cloud are routed automatically and encrypted. Simple and cost-effective telephony billing of the MTF Business Cloud guarantees outstanding value for money and keeps administrative efforts low.

TECHNICAL INFORMATION

EXCELLENT VOICE TRANSMISSION QUALITY

Support for the latest speech standards for telephony guarantees the highest possible voice transmission quality.

NEVER OUT OF REACH

Thanks to flexible terminals and IP telephones, you can work anywhere you like and yet still use your work phone number.

LOWER COSTS

Cheaper calls over long distances as well as when phoning between corporate offices.

A COMPLETELY ISOLATED TELEPHONE EXCHANGE

The VoIP switchboard and therefore all the connected components are dedicated for the customer and therefore completely isolated from other systems.

HIGH SCALABILITY

Whether you have five or 1,000 users, the MTF voice over IP solution works perfectly for small as well as larger companies.

SECURE AND POWERFUL

Thanks to our highly-encrypted multipoint VPN including QOS control, all conversations are encrypted and transmitted to the customer's location with the best performance.

TELEPHONES, MOBILE PHONES OR DESKTOPS

Support for a multitude of IP phones, all computer operating systems and mobiles.

REDUNDANCY POSSIBLE

Optional redundancy enables you to maximize the availability of your telephone system.
