

DATA PRIVACY

STRICTEST DATA PROTECTION CREATES TRUST

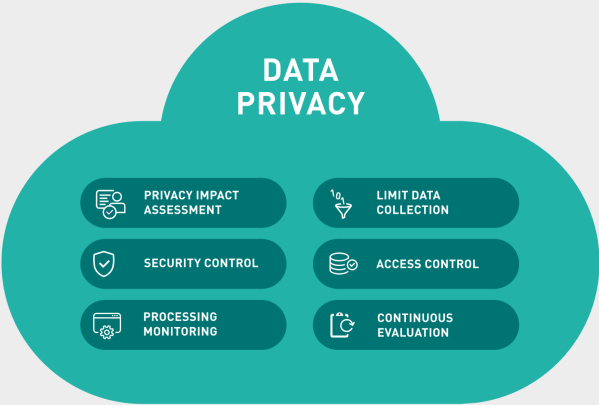

Our customers' data is subject to the strictest data protection. Swiss and EU law prohibit the disclosure of customer data to third parties without the consent of the customer. We adhere strictly to this. Data sovereignty always lies with the customer, which is why many companies from the finance, insurance and healthcare industries rely on us.

YOUR ADVANTAGES

- ✔ SWISS COMPANY WITH TRANSPARENT CORPORATE STRUCTURE
- ✔ ALL DATA IN THE MTF DATA CENTERS IN SWITZERLAND
- ✔ COMPLETE ENCRYPTION OF ALL DATA ACCORDING TO FIPS 104-2
- ✔ COMPLIANCE WITH THE EU GDPR AND SWISS DATA PROTECTION LAW
- ✔ HIGHEST DATA SECURITY THANKS TO PRIVATE CLOUD
- ✔ COMPLETELY DEDICATED HARDWARE POSSIBLE ON REQUEST

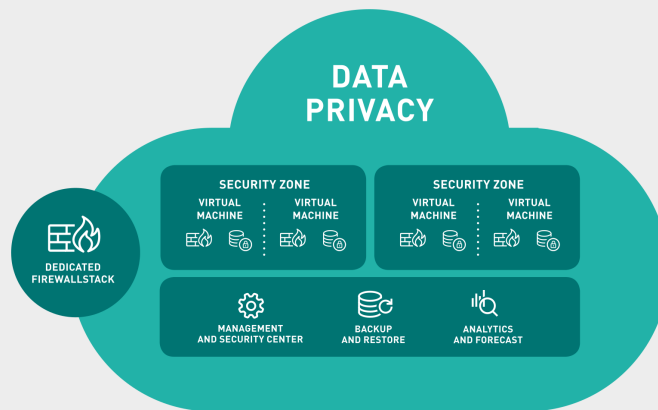

YOUR PRIVACY IS IMPORTANT TO US

The MTF Cloud has industry-leading product features that give you, the customer, full control over your data. This means you can always see when and how your data is being accessed. In addition, we proactively protect your data and always put your privacy inviolably first. We implement the strictest security measures to protect your customer data and ensure your data sovereignty at all times.

PRIVATE CLOUD AS A FOUNDATION

Our cloud ecosystem is fundamentally based on the maxim: for each customer their own private cloud. Thus, by design, we guarantee each customer their own guaranteed data sovereignty. Each environment is completely isolated and fully encrypted. There is no vendor locking and if desired, the entire environment can be moved to another cloud or on-premise. Virtual machines, Kubernetes environments, firewalls, networks and even backups are dedicated and completely separate per customer. It is possible in our cloud stack to run the workload either on shared or dedicated hardware. Management systems such as the backup system or firewall management are completely separate from the customer's production environment and independent in a separate security layer. Access to the respective private cloud is additionally invisible on the Internet and therefore difficult for hackers or cybercriminals to track down, in contrast to public cloud services.

STRICTEST STANDARDS FOR DATA PRIVACY AND COMPLIANCE

NORMS AND STANDARDS AGAINST WHICH WE MEASURE OURSELVES

The European Union's General Data Protection Regulation (EU GDPR), Swiss data protection law as well as ISO 27701 protect the fundamental right to privacy and the protection of personal data. The laws and regulations contain strict requirements that raise and unify standards for data protection, security and compliance. In addition to our own compliance, we aim to provide appropriate services and resources to help our customers comply with the laws and regulations that apply to their activities. In doing so, we offer specific functions to simplify and enable our customers' compliance with laws and standards.

SPECIFIC FUNCTIONS

- Customized Contract
- Encryption
- Monitoring and logging
- Access control
- Data protection
- Security by Design
- Certifications and programs
