

## BIM, CAD AND OFFICE365 FROM THE MTF PRIVATE CLOUD

Reasco AG with its sophisticated portfolio for real estate, architecture, services and safety places high demands on digital data processing. In cooperation with MTF, Reasco is pushing ahead with its digitalization by switching to the MTF Private Cloud. The implemented solution enables CAD drawing from the cloud, offers a BIM platform and integrates all-round systems such as ERP and Office365 seamlessly and securely.

## HIGHLIGHTS

- ✓ CLOUD SOLUTION FOR LOCATION-INDEPENDENT CAD DRAWING
- ✓ SEAMLESS INTEGRATION WITH OFFICE365 FOR OPTIMAL TEAMWORK AND COLLABORATION
- ✓ REDUCE IT EXPENSES THROUGH CONSOLIDATION AND UNIFICATION
- ✓ COMPLETE IT SOLUTION FROM THE CLOUD, NO MORE LOCAL IT REQUIRED
- ✓ EASY COLLABORATION EVEN IN LARGE PROJECTS WITH BIM CLOUD
- ✓ TRANSPARENT, FIXED MONTHLY COSTS AND LOW ONE-OFF INVESTMENTS
- ✓ DATA IN HIGHLY SECURE, ENCRYPTED PRIVATE CLOUD FROM MTF

# WITH THE MTF CLOUD DESKTOP EFFICIENT DIGITALIZATION

---

## CHALLENGE

Reasco AG, with its four core competencies of real estate, architecture, services and safety, is a versatile company with a high degree of professionalism. The pragmatic and practical orientation places the highest demands on the IT systems and the associated business processes. Digital communication and the simple exchange of data, information and processes within and outside the company are among the most important factors. In addition to conventional IT systems such as an ERP system and office applications, Reasco also aims to create location-independent CAD drawings and to share project progress with other partners easily and securely via BIM Cloud.

## SOLUTION

The Cloud Desktop from MTF is the perfect solution for the requirement profile of a digitized company like Reasco AG. The highly secure and georedundant solution operated in the private cloud enables location-independent work for the entire company, whether office worker, sales representative or CAD draughtsman. The BIM solution integrated in the private cloud enables access to building models and offers an optimal platform for collaboration in larger BIM projects. The seamless integration of the Office365 platform also makes it easy to exchange data. Project teams can efficiently work together with OneDrive, SharePoint, Teams or even Office Online without restrictions. Despite high collaboration possibilities, business-critical ERP data is securely stored in MTF's encrypted Swiss private cloud.

## REASCO AG

---

The owner-managed Reasco AG, with its domicile directly on the Rhine Falls, the largest waterfall in Europe, employs 83 people. The company is completely dedicated to real estate and the diverse services it provides.
