SME DIGITISATION COMPREHENSIVE, INDIVIDUAL & PERSONAL

FROM A TO Z

For us, one thing is clear: we accompany our customers throughout the entire journey to becoming a digitalised SME and beyond. Together, we identify new opportunities for more efficiency in your company and thus enable you to perfect your business processes with the help of digital solutions. From stocktaking to conception, implementation, internal training and support of the ongoing infrastructure, we are at your side. With us, you get a partner who understands your needs and speaks the language of SMEs.

SWISS PRIVATE CLOUD

Our MTF Business Cloud is designed from the ground up for SME customers and impresses with its enormous flexibility, the possibility of integrating any industry applications and maximum security. We operate our own geo-redundant data centres in Switzerland and thus guarantee compliant and secure data storage in accordance with Swiss law. In our private cloud, you do not share any resources with other companies, but receive a completely independent infrastructure in one of the best private cloud data centres in Switzerland.

PERSONAL AND CLOSE TO YOU

Your support is very important to us. As a system house operating throughout Switzerland, we are represented in every region of Switzerland. This means you can be sure of having a digitisation partner who is also at home in your region. This guarantees local support on site and you receive a personal contact person in the single point of contact principle. With this approach, we make the cooperation personal and you always know who is responsible for your concerns.

TAILORED TO YOUR NEEDS

The requirements for successful digitisation are individual for each industry. Based on a flexible foundation tailored for you, we are able to map any industry applications, interfaces and processes in a meaningful and digital way. As a result, you not only achieve the highest possible automation for your processes, but can also concentrate fully on your core business while we continuously develop your digital tools.

SELECTION OF OUR ALREADY DIGITISED SME CUSTOMERS
