

# CYBER SECURITY

---

## FULLY COMPREHENSIVE CYBERSECURITY AND DATA PROTECTION

---

Les défis de la sécurité informatique sont multiples. Les situations de menace évoluent constamment et la numérisation crée de nouvelles cibles. Les PME sont de plus en plus la cible d'attaques de pirates informatiques et les pertes de données, les pannes de systèmes ou les dommages financiers qui en découlent ont des conséquences considérables. Nous vous proposons une cyberdéfense complète pour l'ensemble de votre infrastructure informatique.

## HIGHLIGHTS

---

- ✔ PROTECTION OF YOUR DATA AND KNOW-HOW AS THE PRIMARY GOAL
- ✔ EXPERIENCED ENTERPRISE CYBER DEFENCE TEAM AVAILABLE AT ALL TIMES
- ✔ ADVICE AND SUPPORT FOR YOUR OWN SECURITY CERTIFICATIONS
- ✔ STRATEGY, CONCEPTION AND IMPLEMENTATION FROM A SINGLE SOURCE
- ✔ NUMEROUS CERTIFICATIONS GUARANTEE COMPLIANCE WITH THE LATEST STANDARDS

# ORGANISATIONAL AND TECHNICAL ALL-ROUND PROTECTION

Trustworthy IT systems are the basis for the digitalisation of production processes and services. Based on the leading security standards (ISO 27001, ISO 22301 and many more), our security experts support you from the development of the security strategy and the planning of your security infrastructure to the continuous adaptation and further development of your all-round cyber security protection.

# COMPREHENSIVE OFFER FOR THE HIGHEST CYBER PROTECTION

---

## SECURITY STRATEGY AND RISK MANAGEMENT

We support you in terms of content and methodology in the development of your security policy and your security strategy, in the creation of the concept and the corresponding architecture.

- Development of a comprehensive cyber security strategy for SMEs
- Development of risk management principles and guidelines
- Support in the development of related TOMs
- Awareness training on cyber security and risk management

## CYBER DEFENSE

Defending your business against security breaches by quickly detecting, responding to, remediating and transparently communicating attacks without delay.

- Incident response and breach management
- 24/7 Enterprise Cyber Defense Center for proactive monitoring
- Threat intelligence services including SIEM integration
- Vulnerability scanning and penetration testing guarantee the highest level of security

## SECURED INFRASTRUCTURE

We develop, install and integrate perimeter, network, endpoint and advanced protection solutions according to your individual cyber security requirements.

- Comprehensive endpoint security including MDR or EDR
- Network Security Services with Next-Gen Perimeter, UTM, IPS, etc.
- Application Delivery Controller for application security
- Data centre security and software-defined networking (SDN)

## DIGITAL IDENTITY

Enable people, applications and machines to verify their digital identities to access data and services securely and traceably.

- Identity management services including multi-factor authentication
- Authentication brokers to control access
- Centralised account management for greater control
- Single point of entry for VPN, application access and desktops
