

UNIFIED COMMUNICATION & COLLABORATION

NEW FORMS OF COMMUNICATION FOR NEW WAYS OF WORKING

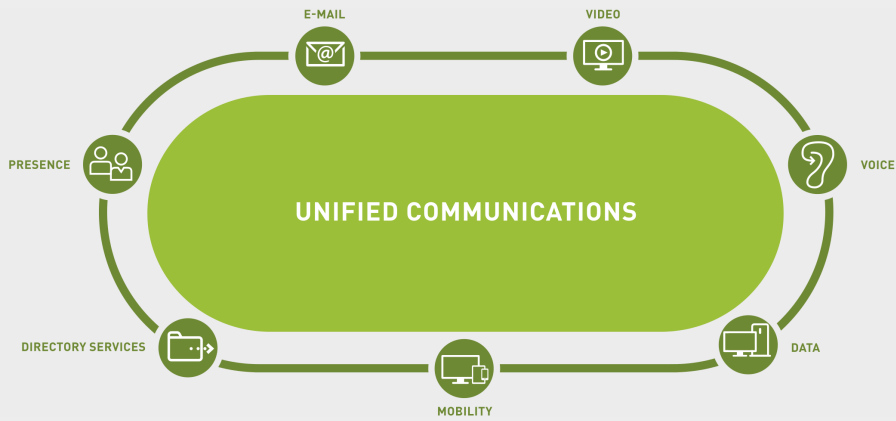

The labor market is changing rapidly. Employees want access to their data anytime, anywhere. That's why they need powerful business communication and collaboration tools that secure their company's competitiveness.

YOUR ADVANTAGES

- ✔ UNIFIED COMMUNICATION VIA THE CLOUD OR ON PREMISE
- ✔ HOLISTIC AND PERSONAL ADVICE
- ✔ PERSONAL SUPPORT AND ON-SITE ASSISTANCE
- ✔ A UNIFORM COMMUNICATION PLATFORM
- ✔ EFFICIENT BUSINESS PROCESSES THROUGH INTUITIVE COMMUNICATION

UNIFIED COMMUNICATION AND COLLABORATION

Unified communication and collaboration is the technological synchronization of all communication channels. As part of this, for example, areas such as sales and customer communication; marketing and staff meetings; customer support-related consultancy and services; as well as decision-makers and business partners, service providers and even customers are integrated simply into the available communication solutions.

A COMPREHENSIVE PORTFOLIO

VOICE OVER IP

Whether local or cloud-based, voice over IP solutions provide forward-looking communication and a scalable and cheap cloud telephony solution.

- Advice, project management and operation
- Cloud-based or on premise VoIP
- High availability, scalability, security and performance capacity

UNIFIED MESSAGING

Unified messaging offers uniform, integrated handling of incoming and outgoing messages from various communication solutions.

- SMS, fax, e-mail and voicemail in a single solution
- Secure communication thanks to encryption and signatures
- High scalability and flexibility.
