

SERVICES & STORAGE

HUGE INCREASES IN DATA VOLUMES WITHOUT A MASSIVE RISE IN COSTS

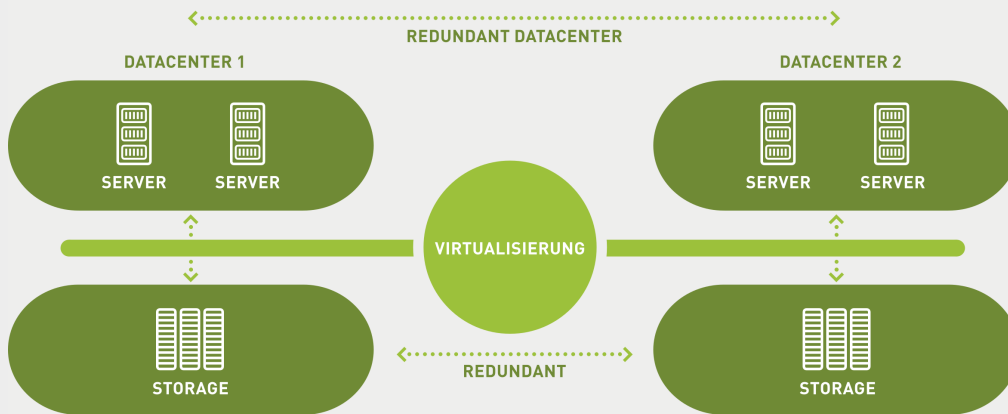

The more technology progresses, the greater the flood of data from digital information that your company must store and manage. Efficient IT infrastructures must therefore not only be highly available but also flexible and scalable to react to changing demands.

YOUR ADVANTAGES

- ✔ A COMPETENT PARTNER FOR ALL YOUR NEEDS
- ✔ A SINGLE POINT OF CONTACT
- ✔ MANUFACTURER INDEPENDENT ADVICE
- ✔ REFERENCES GIVE YOU PEACE OF MIND
- ✔ HIGHLY AVAILABLE SOLUTIONS FOR SMALL, MIDSIZE AND LARGE COMPANIES
- ✔ A CHOICE BETWEEN HYBRID CLOUD OR CLOUD BACKUP
- ✔ COMPLETE INTEGRATION BY MTF

A REDUNDANT SERVER AND STORAGE ARCHITECTURE

The infrastructure architects at MTF offer tailored server and storage concepts, whatever your needs, no matter how big your data center may be. We're there for you with modern approaches that cut costs sustainably while at the same time significantly simplifying and standardizing operation.

A COMPREHENSIVE PORTFOLIO

ARCHITECTURE CONSULTANCY

Good advice from MTF: Our specialists have many years' experience and can therefore develop holistic strategies and sustainable solutions for modern data centers.

- Independent strategic development
- Designing highly available servers and storage environments
- SAN, NAS or hyper-converged infrastructure solutions

SYSTEMS INTEGRATION

The configuration and commissioning of your desired IT infrastructure is conducted by our experienced systems integration experts. Reliable and cost-effective.

- Infrastructure sourcing, installation and commissioning
- Integration of backup and archiving solutions
- Complete integration of software and hardware

DATACENTER ENGINEERING

MTF operates its own cloud data centers and has more than 100 satisfied customers. Together with you, our cloud expertise team implements state-of-the-art data center technology that perfectly matches your performance requirements.

- Strategic data center consultancy based on the latest technologies
- Software defined data center (SDDC) design and implementation
- The consolidation of servers, storage, networks and security
